

RCE workshop

Benedito Sakugawa Diego Palma Ricardo Alves

São José dos Campos, 26-Oct-2010

RCE workshop – Software/AEH

→ FAA Notice 8110.110 (overview and discussion)

Coffee Break

Early Involvement vs. Independence (brainstorming)

Type of Delegation vs. Activities Visibility
(brainstorming)

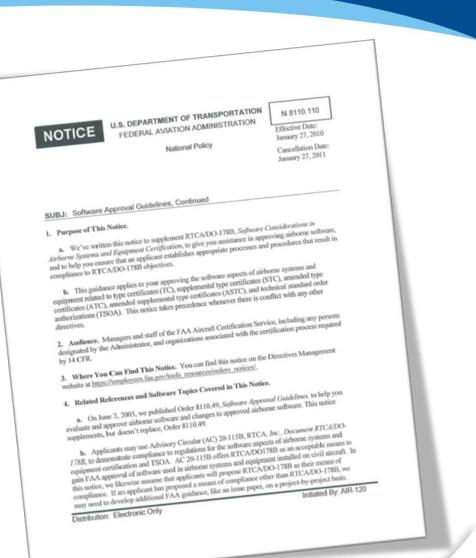

RCE workshop – Software/AEH

FAA Notice 8110.110

☆ January 27, 2010 ♦ January 27, 2011

Plan: revise FAA Order 8110.49

- -> Overseeing Suppliers
- -* Software Problem Reporting
- -> Databases
- -> Software Environment

Chapter 1: Properly Overseeing Suppliers

-> When to Apply

Contemporary Issues

- Oversight Plans and Procedures
- Review the Applicant's Plans

-> When to Apply?

When an applicant uses suppliers and sub-tier suppliers to perform system and software development, verification, and certification activities

-> Contemporary Issues

/ lack of expertise in compliance activities

//V&V of LCData at transition point

Certification tasks in foreign countries

Retention of substantiating data

Oversight Plans and Procedures

Create oversight Plans&Proc: ensure suppliers will comply with all regulations, policy, guidance, agreements and standards ...

Planning docs (e.g. CertPlan, PSAC): how visibility of suppliers' activities (including COTS vendors)

Review the Applicant's Plans (1/2)

Visibility into compliance with regulations, policy, plans, standards, and agreements

- / Integration Management: ...
- Comparison Comparis
- Problem reporting and resolution

Review the Applicant's Plans (2/2)

Integration verification activity

Configuration management

Compliance substantiation & data retention...

Cert.Data in the USA and in English

Overseeing Suppliers

- -> Software Problem Reporting
- -> Databases
- -> Software Environment

-> Certification Issues

Aircraft impact analysis

Applicant visibility

Clarge number of OPRs

Oversight

-> Objectives

Reported & Resolved

Software Development Assurance Before Certification

-> Requirements

PR Management Plan

Suppliers and sub-tiers process
 PR Categorization
 Applicant notification
 Review & change control boards
 OPR acceptability criteria

-* Requirements

Suppliers and sub-tiers process

Reported
Re-verified

Controled

- Resolved
- / Implemented

ANAC

-> Requirements

/ PR categorization

Aircraft and design assurance impact.

Before certification X Beyond certification

~ Criteria for deferring problem

-> Requirements

Applicant notification
 Applicant X supplier PR system
 Describe any tools (action items or observations)
 Only one supplier PR system
 Visibilities to appropriate disciplines

-* Requirements

Review & change control boards

Human Factors

✓ Software

-> Requirements

✓OPR acceptability criteria

Safety, functionality, and operation impacts

Upper boundary or target limit on the number of OPRs

Time limit that OPR will be resolved

- -> Authority Activities
 - Review all OPRs
 - Assure reassessment of PDS
 - Assure inter-relationship of multiple POR
 - Assure review of AD, SB, or Op. Limitation related OPR
 - Assure compliance with DO-178B 11.20 (j)

-> When to Apply?

Suppliers & Sub-tiers

Before & After Certification

Overseeing Suppliers

- Software Problem Reporting
- -> Databases
- -> Software Environment

->> Database Types

Aeronautical Databases

Airborne System Databases

Other Applications and Databases

Certification Issues

Aeronautical Databases appropriate assurance level

Airborne System Databases properly verification

-> Authority Activities

Review loading procedures

Ensure maintenance instructions and limitations

Ensure a process for updating each database

-> Authority Activities

Aeronautical Databases

Ensure DO-200AEnsure appropriate assurance level

-* Authority Activities

Airborne System Databases

Review safety assessment

Ensure appropriate software level

When To Apply?

Aeronautical Databases

/ Airborne System Databases

Overseeing Suppliers

- Software Problem Reporting
- ✓ Databases
- -> Software Environment

Chapter 4: Managing Software Development and Verification Environment

Chapter 4 – Managing Software Development and Verification Environment

->> When to Apply

How representative is the Environment?

 Controlling the Development and Verification Environment

35

Chapter 4 – Managing Software Development and Verification Environment

-> When to Apply?

When applicant is using a software development or verification environment that may not be completely representative of the target computer

How representative is the Environment?

CDO-178B: target computer, target emulator, host computer simulator.

Go through several iterations

Environment Not-EQ final hardware

Needs: ConfigCtrl + PR system

Controlling the Software Development and Verification Environment (SDVE)

SVP should include:

/ difference between SDVE and production

SDVE description and DO-178B objectives

Controlling the SDVE

SVP should include:

How SDVE will be used to comply with 178B for entire .exe

Completed Verification Activities (SDVE-CIA + SDVE evolution + regression?)

Controlling the SDVE

SCMP should include:

SDVE ConfigCtrl description + responsible

SDVE PR system available to all users (see Chapter 2)
