

All pilots, flight attendants, flight engineers, maintenance technicians, flight instructors and flight dispatchers must have their Licenses and Ratings issued in order to act in the corresponding activity.

The National Civil Aviation Agency – Brazil is responsible for elaborating exams to evaluate these professionals' knowledge and for certifying them to work in the aviation industry.

PERSONNEL LICENSING

Pilot | Flight Attendant
Flight Engineer
Maintenance Technician
Flight Instructor | Flight Dispatcher

Ministério da Defesa

QUALIFICATION / TRAINING

ANAC has the institutional duty of regulating and inspecting all aspects of flight safety which depend directly on training, qualification and specialization of airmen.

In order to certify pilots, flight engineers, flight attendants, maintenance technicians, flight dispatchers and special equipment operators, some requirements must be met in respect of age, level of instruction, knowledge, experience, flight instruction, skill and medical fitness. Such requirements are established in RBHA 61, 63, 65 and IAC 3255, according to each license.

Medical fitness is assessed and certified by the Aeronautical Medical Centre – CEMAL or by a Special Medical Board with renewal intervals appropriate to each license.

After showing technical proficiency through compliance with the requirements mentioned above, ANAC issues the licenses and/or ratings and certifies the professional to work in the aviation industry.

REQUIREMENTS FOR PILOT LICENSING:

Pilot licenses are divided into three levels:

- Private Pilot: for airplane, helicopter, glider and free balloon categories.
- Commercial Pilot: for airplane, helicopter, glider and free balloon categories.
- Airline Transport Pilot: for airplane and helicopter categories.

Private Pilot License – PPL

- Be at least 18 years of age;
- Elementary School degree;
- Current Class 2 Medical Certificate
- Pass a knowledge test appropriate to the holder of a PPL;
- Minimum flight time required for the category of aircraft intended*
- Pass the required practical test.

Commercial Pilot License – CPL

- Be at least 18 years of age;
- High School Degree;
- Current Class 1 Medical Certificate
- Pass a knowledge test appropriate to the holder of a CPL;
- Minimum flight time required for the category of aircraft intended*
- Pass the required practical test.

Airline Transport Pilot License – ATPL

- Be at least 21 years of age;
- High School Degree;
- Current Class 1 Medical Certificate
- Pass a knowledge test appropriate to the holder of a ATPL;
- Minimum flight time required for the category of aircraft intended*
- Pass the required practical test.

* For further information on minimum flight time required for each licence, visit www.anac.gov.br/habilitacao

OTHER LICENCES

In order to obtain information about flight engineer, flight attendant, maintenance technician, flight dispatcher, flight instructor or special equipment operator licenses, visit www.anac.gov.br/habilitacao, where you will find all the requirements to be met before the issuance of each license, such as knowledge, experience, flight instruction, etc.

Applicants shall enroll for the tests at ANAC Regional Offices or at the Civil Aviation Office in Curitiba. You can find information on how to contact us on the back of this folder.
